

# Keep our waters clean, beautiful and pest free

- Regularly clean and antifoul your hull and underwater fittings e.g. propellers, intakes, to minimise hull fouling.
- Check, clean and dry marine equipment (buoys, mooring lines, fishing and dive gear, boat trailers) before moving to a new location.
- Dispose of any debris from your hull or equipment appropriately on land.
- Remember to check with your regional council regarding any requirements before cleaning your boat in or over the water.
- Report suspected exotic marine pests to **0800 80 99 66**.

These actions will help prevent the spread of harmful marine pests and protect New Zealand's waters.
